

Curriculum Vitae

Frank E. Curtis, Ph.D.
Professor
Director of Graduate Studies
Industrial and Systems Engineering
Lehigh University

<http://coral.ise.lehigh.edu/frankecurtis>

A. Biographical Information

Home Address

301 W. 53rd St., Apt. 9A
New York, NY 10019
Phone: +1 (646) 789-5490
E-mail: frank.e.curtis@gmail.com

Business Address

200 W. Packer Ave., Rm. 471
Bethlehem, PA 18015
Phone: +1 (610) 758-4879
E-mail: frank.e.curtis@lehigh.edu

Educational History

- Ph.D. Northwestern University, September 2003 – June 2007
Industrial Engineering and Management Sciences
Academic distinction : Nemhauser Doctoral Dissertation Award
Dissertation title : *Inexact Sequential Quadratic Programming Methods for Large-Scale Nonlinear Optimization*
.....advisor : Prof. Jorge Nocedal
.....committee : Prof. Robert Fourer, Prof. Sanjay Mehrotra, Dr. Richard A. Waltz
- M.S. Northwestern University, September 2003 – December 2004
Industrial Engineering and Management Sciences
- B.S. College of William and Mary, August 1999 – May 2003
Computer Science and Mathematics (double major)
Academic distinctions : Phi Beta Kappa, Magna Cum Laude, Highest Honors in Mathematics
Thesis title : *Special Classes of Zero-One Matrices*
.....advisors : Prof. Chi-Kwong Li, Prof. Rex Kincaid
.....committee : Prof. Weizhen Mao, Prof. John Drew

Employment History

- Professor Lehigh University, May 2021 – present
Department of Industrial and Systems Engineering
- Associate Professor Lehigh University, July 2015 – May 2021
Department of Industrial and Systems Engineering
- Assistant Professor Lehigh University, August 2009 – June 2015
Department of Industrial and Systems Engineering
- Postdoctoral Researcher New York University, September 2007 – August 2009
Courant Institute of Mathematical Sciences
- Postdoctoral Researcher Northwestern University, July 2007 – August 2007
Department of Industrial Engineering and Management Sciences
- Graduate Research Assistant Northwestern University, May 2004 – June 2007
Department of Industrial Engineering and Management Sciences
- Intern Intel Corporation, June 2005 – August 2005
Corporate Technology Group
- Undergraduate Research Assistant College of William and Mary, May 2002 – August 2003
Department of Mathematics

Endowed Positions

Frank Hook Assistant Professor
P. C. Rossin Assistant Professor

Lehigh University, August 2013 – July 2015
Lehigh University, August 2010 – July 2012

Visiting Positions

Visiting Associate Professor (McCarter Fellow)
Visiting Research Scientist
Visiting Research Scientist

Northwestern University, May 2018 – June 2018
New York University, January 2018 – May 2018
Columbia University, August 2017 – May 2018

B. Publications and Creative Activities¹**Books (Authored)**

- [1] Frank E. Curtis and Daniel P. Robinson. Practical Nonconvex Nonsmooth Optimization. (In preparation, under contract with SIAM for MOS-SIAM Series on Optimization), 2024.

Books (Edited)

- [2] Tamás Terlaky and Frank E. Curtis, editors. *Modeling and Optimization: Theory and Applications – Selected Contributions from the MOPTA 2010 Conference*. Springer Proceedings in Mathematics and Statistics. Springer, New York, NY, USA, 2012.

Book Chapters (Authored; Refereed)

- [3] Arvind U. Raghunathan, Frank E. Curtis, Yusuke Takaguchi, and Hiroyuki Hashimoto. Fast Market Clearing Algorithms. In *Energy Markets and Responsive Grids*, chapter 7, pages 155–175. Springer, 2018.

Published Review Articles (Authored; Refereed)

- [4] James V. Burke, Frank E. Curtis, Adrian S. Lewis, Michael L. Overton, and Lucas E. A. Simoes. Gradient Sampling Methods for Nonsmooth Optimization. In *Numerical Nonsmooth Optimization*, chapter 6, pages 201–225. Springer, 2020.
- [5] Léon Bottou, Frank E. Curtis, and Jorge Nocedal. Optimization Methods for Large-Scale Machine Learning. *SIAM Review*, 60(2):223–311, 2018.
- [6] Frank E. Curtis and Katya Scheinberg. Optimization Methods for Supervised Machine Learning: From Linear Models to Deep Learning. In *INFORMS Tutorials in Operations Research*, chapter 5, pages 89–114. Institute for Operations Research and the Management Sciences (INFORMS), 2017.

Published Journal Articles (Authored; Refereed)

- [7] Gülçin Dinç Yalçın and Frank E. Curtis. Incremental Quasi-Newton Algorithms for Solving Nonconvex, Nonsmooth, Finite-Sum Optimization Problems. *Optimization Methods and Software*, 39(2):345–367, 2024.
- [8] Frank E. Curtis, Suyun Liu, and Daniel P. Robinson. Fair Machine Learning through Constrained Stochastic Optimization and an ϵ -Constraint Method. *Optimization Letters*, 18:1975–1991, 2024.
- [9] Frank E. Curtis, Michael J. O’Neill, and Daniel P. Robinson. Worst-Case Complexity of an SQP Method for Nonlinear Equality Constrained Stochastic Optimization. *Mathematical Programming*, 205:431–483, 2024.

¹Standard practice in my research field is to list authors alphabetically, as is done for most of the articles in this section. These articles and technical reports are available on my personal website: <http://coral.ise.lehigh.edu/frankecurtis/publications>

- [10] Frank E. Curtis, Shima Dezfulian, and Andreas Wächter. Derivative-Free Bound-Constrained Optimization for Solving Structured Problems with Surrogate Models. *Optimization Methods and Software*, 39(4):845–873, 2024.

Software

- [NonOpt](#), author
Open source C++ code for solving nonsmooth, nonconvex optimization problems.
- [StochasticSQP](#), author
Matlab source code for solving constrained continuous optimization problems using stochastic sequential quadratic optimization techniques. Code written by me; see Published Journal Articles [21, 9, 12] above.
- [SCBFGS](#), author
Matlab source code for a stochastic quasi-Newton method for solving optimization problems arising in supervised machine learning. Code written by me; see Published Journal Articles [70] above.
- [TRACE](#), author
Matlab source code for solving unconstrained continuous optimization problems using a trust-region algorithm with contractions and expansions. Code written by me; see Published Journal Article [40] above.
- [AggQN](#), author
Matlab source code for aggregated quasi-Newton updating strategies. Code written by me; see Published Journal Article [18] above.
- [PIPAL](#), author
Matlab source code for solving constrained continuous optimization problems using a penalty-interior-point technique. Code written by me; see Published Journal Article [55] above.
- [SLQP-GS](#), author
Matlab source code for solving nonsmooth constrained continuous optimization problems using sequential linear or quadratic optimization techniques. Code written by me; see Published Journal Article [53] above.
- [GRANSO](#), contributor
Matlab source code for solving nonsmooth, nonconvex optimization problems with nonsmooth, nonconvex constraints. I co-advised, with Michael Overton, the writing of the code by Tim Mitchell; see Published Journal Article [42] above.
- [IPOPT](#), contributor
Open source C++ software package for solving nonlinear optimization problems. Code written by Andreas Wächter and Carl Laird, managed by Andreas Wächter and Stefan Vigerske as part of the [COIN-OR](#) initiative. I aided in the implementation of a new algorithm in the package, an interior-point method with inexact step computations; see Published Journal Articles [54, 56] above.
- [filterSD](#), manager, code written by Roger Fletcher
Open source Fortran 77 software package for solving nonlinear optimization problems. Code managed by me as part of the [COIN-OR](#) initiative.

Websites

- [Personal Homepage](#)
My personal homepage includes descriptions of my research projects; electronic versions of my journal articles, technical reports, and materials from my scholarly presentations; freely available prototype software; syllabi for my courses; and information about my collaborators and students.
- [OptML Research Group](#)
Established in 2015, the Optimization and Machine Learning (OptML) Research Group at Lehigh was created by Katya Scheinberg, Martin Takáč, and me. It is now led by me, Daniel P. Robinson, and Luis Nunes Vicente. The group meets for weekly discussions and maintains resources for faculty members and students working in and around the intersection between Optimization and Machine Learning.

- [ICCOPT 2022](#)
ICCOPT 2022, a major conference of the Mathematical Optimization Society, was co-organized by Prof. Daniel P. Robinson and me at Lehigh in 2022. One of our roles was to create and maintain the conference website, which included all pertinent information for participants and sponsors of the conference. As far as we are aware, it is the largest academic conference ever held at Lehigh.
- [COR@L Laboratory](#)
From 2010 to 2018, I aided in maintaining and updating the website of the COR@L Laboratory, housed in the ISE department at Lehigh. This site includes information for and about the laboratory's people and projects. The laboratory also maintains a set of mailing lists that are used extensively by members of the ISE department to share and disseminate information to others within the department and outside the university that are affiliated with the laboratory.
- [Lehigh ISE Department](#)
From 2011 to 2019, I aided in maintaining and updating the ISE department's website, especially those pages related to advertising our Ph.D. program and its students.
- [U.S.-Mexico Workshop on Optimization and its Applications](#)
This workshop has been held every few years to foster collaboration between researchers in the United States and Mexico working in fields related to mathematical optimization. I co-organized the workshop in 2016 and was solely responsible for creating and maintaining the website, which housed information about the workshop and included web forms for registration and abstract submission.
- [MOPTA Conferences](#)
The MOPTA Conference has been held annually since 2001, and has been held at Lehigh since 2009. I aided in creating and maintaining the conference website in 2010, and was solely responsible for creating and maintaining the website from 2011 to 2013. The conference website includes information about the meeting, but also includes web forms for registration, abstract submission, and submission for the student modeling competition (co-sponsored by [AIMMS](#)).

C. Honors and Awards

Professional Society Awards

Lagrange Prize in Continuous Optimization	MOS/SIAM	2021
ICS Prize	INFORMS Computing Society	2018

Paper Awards

Best Paper of the Year Award	Optimization Letters	2018
------------------------------	----------------------	------

Conference Awards

ICML 2018 Top 10 Reviewer Award	ICML	2018
---------------------------------	------	------

University Awards

Libsch Research Award	Lehigh University	2023
-----------------------	-------------------	------

College Awards

Excellence in Research Scholarship and Leadership	P.C. Rossin College of Engineering and Applied Science	2023
---	--	------

Department Awards

Graduate Teacher of the Year, ISE	Lehigh University	2014–2015, 2019, 2022
-----------------------------------	-------------------	--------------------------

Dissertation and Thesis Awards

Nemhauser Doctoral Dissertation Award	Northwestern University	2008
Highest Honors in Mathematics	College of William and Mary	2003

Graduate and Undergraduate Academic Awards

Walter P. Murphy Fellowship	Northwestern University	2003–2004
Cissy Patterson Award for Mathematics	College of William and Mary	2003

Honor Society Memberships

Phi Beta Kappa		2003–present
----------------	--	--------------

D. Research Funding and Training Grants**Awarded Research Grants (Competitive)**

- “Collaborative Research: AF: Small: A Unified Framework for Analyzing Adaptive Stochastic Optimization Methods Based on Probabilistic Oracles,” Algorithmic Foundations Program, Division on Computing and Communication Foundations, National Science Foundation, effective from January 15, 2022 until December 31, 2024. PI (collaboration with PI Katya Scheinberg, Cornell University). Budget: \$500,000 (total); \$250,000 (Lehigh).
- “Next Generation Algorithms for Stochastic Optimization with Constraints,” Office of Naval Research, Department of Defense, effective from May 11, 2021 until May 10, 2024. PI (with co-PI Daniel P. Robinson, Lehigh University; collaboration with PI Albert S. Berahas, University of Michigan). Budget: \$500,000 (total); \$360,000 (Lehigh).
- “Collaborative Research: AF: Small: Adaptive Optimization of Stochastic and Noisy Function,” Algorithmic Foundations Program, Division on Computing and Communication Foundations, National Science Foundation, effective from October 1, 2020 until September 30, 2023. PI (collaboration with PI Katya Scheinberg, Cornell University). Budget: \$170,000 (total); \$85,000 (Lehigh).
- “An Accelerated Decomposition Framework for Structured Sparse Optimization,” Computational Mathematics Program, Division of Mathematical Sciences, National Science Foundation, effective from July 15, 2020 until June 30, 2023. Co-PI (with PI Daniel P. Robinson, Lehigh University). Budget: \$200,000 (split equally between PI and co-PI).
- “Hybrid Interior-Point/Active-Set PSCOPF Algorithms for Exploiting Power System Characteristics,” Advanced Research Projects Agency – Energy (ARPA-E), Department of Energy, effective from December 13, 2018 until December 12, 2019. PI, Lehigh University (with Andreas Wächter and co-PI Ermin Wei, Northwestern University; Daniel Molzahn, Georgia Tech; and Elizabeth Wong, University of California at San Diego). Budget: \$250,000 (total); \$82,400 (Lehigh).
 - Follow-on award: July 1, 2020 until June 30, 2022. Budget: \$400,000 (total); \$50,909 (Lehigh).
- “Collaborative Proposal: TRIPODS Institute for Optimization and Learning,” Division on Computing and Communication Foundations, National Science Foundation, effective from January 1, 2018 until December 31, 2020. PI/co-PI (with co-PI Prof. Martin Takáč, Lehigh University; Prof. Katya Scheinberg, Cornell University; Francesco Orabona, Boston University; and Han Liu, Northwestern University). Budget: \$895,670 (total); \$597,811 (Lehigh, split equally between PI and co-PIs).
- “AF: Small: New Classes of Optimization Methods for Nonconvex Large Scale Machine Learning Models,” Algorithmic Foundations Program, Division on Computing and Communication Foundations, National Science Foundation, effective from September 1, 2016 until August 31, 2019. Co-PI (with PI Prof. Katya Scheinberg and co-PI Prof. Martin Takáč), Lehigh University. Budget: \$499,143 (split equally between PI and co-PIs).

- “GOALI: Optimizing the Design of Ocean Wave Energy Farms,” Manufacturing Enterprise Systems Program, Division of Civil, Mechanical, and Manufacturing Innovation, National Science Foundation, effective from June 15, 2014 until May 31, 2017. Senior Personnel, Lehigh University. Budget: \$400,000 (1 month support).
- “Randomized Models for Nonlinear Optimization: Theoretical Foundations and Practical Numerical Methods,” Computational Mathematics Program, Division of Mathematical Sciences, National Science Foundation, effective from September 15, 2013 until August 31, 2016. Co-PI (with Prof. Katya Scheinberg), Lehigh University. Budget: \$200,000 (split equally between PI and co-PI).
- “Fast, Dynamic, and Scalable Algorithms for Large-Scale Constrained Optimization,” Early Career Research Program, Advanced Scientific Computing Research, Department of Energy, effective from August 1, 2013 until July 30, 2018. Single PI. Budget: \$750,000.
- “Nonlinear Optimization Algorithms for Large-Scale and Nonsmooth Applications,” Computational Mathematics Program, Division of Mathematical Sciences, National Science Foundation, effective from July 1, 2010 until June 30, 2013. Single PI. Budget: \$110,001.

Other Awarded Grants (Competitive)

- “Collaborative Research: SSMCDAT2020: Solid-State and Materials Chemistry Data Science Hack-a-thon,” Division of Materials Research, National Science Foundation, effective from September 1, 2019 until August 31, 2023 (extended due to COVID-19 pandemic). PI, Lehigh University (with Taylor Sparks, University of Utah). Budget: \$62,639 (total); \$37,426 (Lehigh).

Industry Grants

- ExxonMobil Research and Engineering Company, November 2014. Budget: \$20,000.

Institutional Grants

- Frank Hook Assistant Professorship Award, August 2013 – July 2015. Budget: \$4,000/year.
- P. C. Rossin Assistant Professorship Award, August 2010 – July 2012. Budget: \$10,000/year.
- Faculty Innovation Grant, May 2011 – May 2012. Budget: \$25,000.

Consulting Work

- Mitsubishi Electric Research Laboratories, Inc. (MERL), January 2014 – December 2014
Conducting research on numerical methods for solving Network Utility Maximization (NUM) problems. Work being conducted with Arvind U. Raghunathan of the Data Analytics group at MERL.

E. Editorial Review Board Memberships

- Area Editor (Continuous Optimization), Mathematics of Operations Research 2023 – present
- Associate Editor, IMA Journal of Numerical Analysis 2021 – present
- Associate Editor, Mathematics of Operations Research 2019 – present
- Associate Editor, Mathematical Programming 2018 – present
- Associate Editor, SIAM Journal on Optimization 2016 – present
- Associate Editor, Mathematical Programming Computation 2015 – present

F. Scholarly Presentations²

Conference Plenaries, Semi-Plenaries, and Keynotes

- [75] Frank E. Curtis. Stochastic Algorithms for Nonconvex Constrained Optimization (Semi-Plenary). *International Symposium on Mathematical Programming, Montreal, Canada, July 2024.*
- [76] Frank E. Curtis. Stochastic Algorithms for Continuous Optimization with Nonlinear Constraints (Plenary). *European Conference on Computational Optimization, Heidelberg, Germany, September 2023.*
- [77] Frank E. Curtis. Deterministically Constrained Stochastic Optimization (Plenary). *Neural Information Processing Systems, Workshop on "Order up! The Benefits of Higher-Order Optimization in Machine Learning," New Orleans, LA, USA, December 2022.*
- [78] Frank E. Curtis. Algorithms for Deterministically Constrained Stochastic Optimization (Plenary). *IMA Conference on Numerical Linear Algebra and Optimization, Birmingham, United Kingdom, June 2022.*
- [79] Frank E. Curtis. Algorithms for Deterministically Constrained Stochastic Optimization (Plenary). *International Conference on Machine Learning, Workshop on "Beyond First-Order Methods in Machine Learning Systems," Virtual (Online), July 2021.*
- [80] Frank E. Curtis. Nonconvex Optimization: Opportunities and Challenges (Public Lecture). *East Coast Optimization Meeting, Virtual (Online), April 2021.*
- [81] Frank E. Curtis. Optimization Methods for Large-Scale Machine Learning (Keynote Lecture). *East Coast Optimization Meeting, Virtual (Online), April 2021.*
- [82] Frank E. Curtis. New Quasi-Newton Ideas for (Non)smooth Optimization (Semi-Plenary). *International Conference on Continuous Optimization, Berlin, Germany, August 2019.*

Conference Tutorials

- [83] Frank E. Curtis and Katya Scheinberg. Optimization Methods for Supervised Machine Learning: From Linear Models to Deep Learning (Tutorial). *INFORMS Annual Meeting, Houston, TX, USA, October 2017.*
- [84] Léon Bottou, Frank E. Curtis, and Jorge Nocedal. Stochastic Gradient Methods for Large-Scale Machine Learning (Tutorial). *International Conference on Machine Learning, New York, NY, USA, June 2016.*

Conference Presentations (Invited)

- [85] Frank E. Curtis. Stochastic-Gradient-Based Algorithms for Solving Nonlinearly Constrained Optimization Problems. *SIAM Conference on the Mathematics of Data Science, Atlanta, GA, USA, October 2024.*
- [86] Frank E. Curtis. Stochastic Algorithms for Constrained Optimization for Informed Learning. *INFORMS Annual Meeting, Seattle, WA, USA, October 2024.*
- [87] Frank E. Curtis. Stochastic-Gradient-based Interior-Point Methods. *Allerton Conference on Communication, Control, and Computing, Urbana-Champaign, IL, USA, September 2024.*
- [88] Frank E. Curtis. Stochastic Algorithms for Constrained Continuous Optimization: Stochastic-Gradient-based Interior-Point Algorithms. *ESI Workshop: One World Optimization Seminar, Vienna, Austria, June 2024.*
- [89] Frank E. Curtis. Stochastic-Gradient-based Interior-Point Algorithms. *INFORMS Optimization Society Conference, Houston, TX, USA, March 2024.*

²The slides for most talks listed here are available at <http://coral.ise.lehigh.edu/frankecurtis/talks>. Invited conference and seminar presentations about our work have also been given by my collaborators and students, which are not listed here.

- [90] Frank E. Curtis. Stochastic Algorithms with Adaptive Parameters for Solving Constrained Optimization Problems. *INFORMS Annual Meeting, Phoenix, AZ, USA*, October 2023.

Organized Conferences

- International Conference on Continuous Optimization (ICCOPT)
 - Bethlehem, PA, USA: 2022.
- Modeling and Optimization: Theory and Applications (MOPTA)
 - Bethlehem, PA, USA: 2022, 2015, 2014, 2013 (Chair), 2012, 2011, 2010.
- U.S.-Mexico Workshop on Optimization and its Applications
 - Mérida, Yucatán, Mexico: 2016.

Organized Conference Workshops

- International Conference on Machine Learning

- "Optimization Methods for the Next Generation of Machine Learning," New York, New York, USA, 2016.

Organized Conference Clusters

- INFORMS Annual Meeting
 - "Emerging Topics: AI and ML," Seattle, Washington, USA, 2019.
 - "Nonlinear Programming," Phoenix, Arizona, USA, 2012.
 - "Nonlinear Programming," Charlotte, North Carolina, USA, 2011.
- International Conference on Continuous Optimization (ICCOPT)
 - "Nonlinear Optimization," Lisbon, Portugal, 2013.
- International Symposium on Mathematical Programming (ISMP)
 - "Nonlinear Programming," Montreal, Canada, 2024.
 - "Nonlinear Programming," Pittsburgh, Pennsylvania, USA, 2015.

Organized Conference Sessions and Minisymposia

- INFORMS Annual Meeting
 - "Nonconvex and Nonsmooth Optimization," virtual, 2020.
 - "Nonlinear and Nonsmooth Methods," virtual, 2020.
 - "Nonlinear Optimization Algorithms," Houston, Texas, USA, 2017.
 - "Nonlinear Optimization Algorithms I-II," Nashville, Tennessee, USA, 2016.
 - "Nonlinear Optimization Algorithms," Philadelphia, Pennsylvania, USA, 2015.
 - "Large-scale Nonlinear Optimization Algorithms," San Francisco, California, USA, 2014.
 - "Nonlinear Optimization Algorithms," Minneapolis, Minnesota, USA, 2013.
 - "Algorithms for Nonlinear Optimization," Phoenix, Arizona, USA, 2012.
 - "Algorithms for Nonlinear Optimization," Charlotte, North Carolina, USA, 2011.
 - "Applications of Nonlinear Optimization," Charlotte, North Carolina, USA, 2011.
 - "Large-Scale/PDE-Constrained Optimization," Austin, Texas, USA, 2010.
- INFORMS Optimization Society Conference
 - "Nonlinear Optimization," Coral Gables, Florida, USA, 2012.
- International Conference on Continuous Optimization (ICCOPT)
 - "Nonlinear Optimization Algorithms I-II," Tokyo, Japan, 2016.
- International Symposium on Mathematical Programming (ISMP)
 - "Nonlinear Optimization I – V," Berlin, Germany, 2012.
- Modeling and Optimization: Theory and Applications (MOPTA)
 - "Nonlinear Optimization Algorithms," Bethlehem, Pennsylvania, USA, 2019.
 - "Nonlinear Optimization Algorithms," Bethlehem, Pennsylvania, USA, 2015.
 - "Nonlinear Optimization," Bethlehem, Pennsylvania, USA, 2012.
 - "Nonlinear Programming," Bethlehem, Pennsylvania, USA, 2011.

- SIAM Conference on Optimization
 - “Algorithms at the Intersection of Nonlinear, Stochastic, and Mixed-Integer Optimization I–II,” Vancouver, British Columbia, Canada, 2017.
 - “Large-Scale, Distributed, and Multilevel Optimization Algorithms,” San Diego, California, USA, 2014.
 - “Stochastic, Noisy, and Mixed-Integer Nonlinear Optimization,” San Diego, California, USA, 2014.
 - “Advanced Algorithms for Constrained Nonlinear Optimization,” San Diego, California, USA, 2014.
 - “Modern Sequential Quadratic Algorithms for Nonlinear Optimization,” San Diego, California, USA, 2014.
 - “Nonlinear Constrained Optimization,” Boston, Massachusetts, USA, 2008.

Conference Program Committee Membership

- International Conference on Continuous Optimization (ICCOPT), Bethlehem, PA, USA, 2022.
- International Symposium on Mathematical Programming (ISMP), Bordeaux, France, 2018.

Invited Conference Panelist

- INFORMS Annual Meeting
 - “Academic Job Search Panel,” Anaheim, California, USA, October 2021.
- SIAM Conference on Optimization
 - “Forward Looking Panel Discussion,” San Diego, California, USA, May 2014.

G. Teaching and Research Advising

Courses Taught (Lehigh University)

- IE172 *Algorithms for Systems Engineering* S-'11
 This course (now ISE172), which may be used as a required course for ISE majors, introduces students to rigorous computer programming principles in the context of algorithms for solving common problems in Operations Research. When I taught the course, it involved a 3-hour weekly computer lab session that I supervised personally.
- IE220 *Introduction to Operations Research* F-'09, F-'10, F-'11
 This course used to be required for all undergraduate students in our department; it introduced students to basic tools used in deterministic and stochastic operations research, including linear programming, integer programming, nonlinear programming, stochastic processes, Markov Chains, and queueing theory. The course has since been split into the new ISE230 and ISE240 courses.
- ISE230 *Introduction to Stochastic Models in OR* S-'21, F-'21
 This course is required for all undergraduate students in our department; it introduces students to basic tools used in stochastic operations research, including optimization under uncertainty, decision analysis, game theory, Markov chains, queueing theory, and Markov decision processes.

- ISE401 *Convex Analysis* S-'14, F-'14, F-'15, F-'16, F-'18, F-'19, F-'20, F-'21, F-'22
 This course (formally IE496: *Convex Analysis and Optimization*) was introduced as a new course of my design; it introduces the mathematics of convex analysis with emphasis on the theoretical principles underlying convex optimization problems, duality, and minimax theory. The course is now required for all first-year Ph.D. students in our department.
- ISE402 *Applied Models in Operations Research* S-'20
 This course is required for all doctoral students in our department; it introduces students to various deterministic and stochastic modeling paradigms in operations research.
- ISE403 *Research Methods* S-'23
 This course is required for all doctoral students in our department; it introduces students to various topics that are useful for the transition from being an undergraduate or master's student to being a doctoral student, such as technical writing skills, computing skills (Linux, LaTeX, git, etc.), and research ethics.
- ISE409 *Time Series Analysis* S-'10, F-'11, S-'13, S-'14, S-'15
 This course (formerly IE409) is a graduate-level course on the mathematical analysis of time series. The course includes a rigorous treatment of discrete time stochastic processes and their use in modeling, analyzing, and forecasting univariate and multivariate time series.
- ISE417 *Nonlinear Optimization* F-'10, S-'12, F-'13, S-'15, S-'16, S-'17, S-'19
 This course (formerly IE417: *Nonlinear Programming*) is a Ph.D.-level course designed to introduce the theoretical principles underlying nonlinear optimization problems and the algorithms designed to solve them. I have taught this course every time that it has been offered since my arrival at Lehigh. It is now a required course for all first-year Ph.D. students in ISE.
- IE496 *Numerical Methods for Optimal Control* F-'12
 This course was introduced as a new course of my design; it covers the fundamental mathematical principles underlying optimal control problems, as well as numerical optimization methods that may be applied to solve them.

Courses Co-Taught or Advised (Lehigh University)

- IE122 *Software Tools* F-'09, F-'10, F-'11
 This course used to be a co-requisite of IE220; it introduced the modeling language AMPL and covered functionality of Matlab, Excel, and Visual Basic for Applications that may be used to solve Operations Research problems. The course was taught by a graduate student, but was supervised by me when I taught IE220. This course was no longer offered once IE220 split.
- Engr005 *Introduction to Engineering Practice* F-'12, F-'15, F-'16
 This course (formerly Engr098) is required by all freshman engineering students; the course itself has been taught by Prof. Keith Gardiner, but I led the ISE department projects.
- Engr498 *Technical Writing for Scientists and Engineers* S-'12 – present
 This course was initially created due to the efforts of a former Lehigh student (Ana Alexandrescu), the former Director of ESL (Tim Bonner), and myself. In addition, during the first semester in which the course was held, I worked with one of the instructors (Ana Maria Ferraro) to design the course and helped review completed assignments by ISE students. Since that time, I have worked with each instructor to tailor the course for ISE students.

Courses Taught (Columbia University)

- *Convex Optimization*, Spring 2018

Courses Taught (New York University)

- *Calculus II*, Spring 2009
- *Linear Algebra*, Fall 2008
- *Nonlinear Optimization*, Spring 2008
- *Elementary Statistics*, Fall 2007

Teaching/Tutoring/Grading Activities Prior to Professorships and Instructorships

- *Engineering Analysis I*, Teaching Assistant, McCormick School of Engineering and Applied Science, Northwestern University, Fall 2006
- *Mathematical Programming I*, Grader, Industrial Engineering and Management Sciences, Northwestern University, Fall 2006
- *Bits and Blocks*, Teacher, Center for Talent Development, Northwestern University, July 2006
- *Numerical Methods for Engineers*, Teaching Assistant, Electrical Engineering and Computer Science, Northwestern University, Spring 2006
- *Deterministic Models*, Teaching Assistant, Industrial Engineering and Management Sciences, Northwestern University, Spring 2005
- *Mathematical Statistics*, Tutor, Chicago Tutor Consortium, Fall 2004
- *Business Calculus*, Tutor, Office of Multicultural Affairs, College of William and Mary, 1997 – 1999

Teaching Evaluations Summary (Lehigh University)

Starting in Fall 2018, Lehigh University asks students to evaluate instructor effectiveness by asking them to score their level of agreement with various statements (with 1 = disagree strongly, 2 = disagree somewhat, 3 = neutral, 4 = agree somewhat, and 5 = agree strongly), including the following:

- Instructor presented content in an organized manner.
- The instructor's teaching methods contributed to my understanding of the course material.
- The course increased my knowledge of the subject matter.

Below are my average scores with respect to these statements as compared to department, college, and university averages. Note: There are no scores for the course that I taught in Fall 2022 since, due to the COVID-19 pandemic, the enrollment in our doctoral courses was too low for evaluations to be solicited.

Course	Semester	# Surveyed (# Enrolled)	A. (Instructor organization)				B. (Teaching methods)				C. ("Increased my knowledge")			
			me	Dept.	Coll.	Univ.	me	Dept.	Coll.	Univ.	me	Dept.	Coll.	Univ.

Postdoctoral Advisees

- Xin Jiang (Ph.D. University of California, Los Angeles) 2022 – present
- Gülçin Dinç Yalçın (Ph.D. Eskişehir Technical University) 2021 – 2022
- Michael O'Neill (Ph.D. University of Wisconsin, Madison) 2020 – 2022
- Albert S. Berahas (Ph.D. Northwestern University) 2018 – 2020

Ph.D. Student Advisees

- Qi Wang, Department of ISE, Lehigh University 2020 – present
- Baoyu Zhou, Department of ISE, Lehigh University 2018 – 2022
 Research: *Methods for Large Scale Nonlinear Optimization and Equality Constrained Stochastic Optimization*
 Notes : Graduated Spring 2022
- Minhan Li, Department of ISE, Lehigh University 2019 – 2021
 Research: *Topics on Data Science and Optimization*
 Notes : Graduated Fall 2021
- Rui Shi, Department of ISE, Lehigh University 2015 – 2020
 Research: *Stochastic Trust Region Algorithms*
 Notes : Graduated Spring 2020

- Mohammadreza Samadi, Department of ISE, Lehigh University 2013 – 2018
 Research: *Efficient Trust Region Methods for Nonconvex Optimization*
 Notes : Graduated Fall 2018
- Wei Guo, Department of ISE, Lehigh University 2011 – 2017
 Research: *Limited Memory Steepest Descent Methods for Nonlinear Optimization*
 Notes : Graduated Spring 2017
- Zheng Han, Department of ISE, Lehigh University 2010 – 2015
 Research: *Primal-Dual Active-Set Methods in Nonlinear Optimization*
 Notes : Graduated Summer 2015
- Xiaocun Que, Department of ISE, Lehigh University 2009 – 2015
 Research: *Randomized Algorithms for Nonconvex Nonsmooth Optimization*
 Notes : Graduated Fall 2015
- Hao Wang, Department of ISE, Lehigh University 2009 – 2015
 Research: *Practical Enhancements in Sequential Quadratic Optimization:
 Infeasibility Detection, Subproblem Solvers, and Penalty Parameter Updates*
 Notes : Graduated Spring 2015
- Jiaxin Liu, Department of ISE, Lehigh University 2010 – 2013
 Research: *Sensitivity Analysis in Second Order Cone Optimization*
 Notes : Co-advised by Prof. Terlaky; left program prior to completing proposal

Doctoral Committee Membership (not including Ph.D. student advisees)

- Shima Dezfulian, Department of IEMS, Northwestern University 2023 – present
- Jiahao Shi, Department of IEOR, University of Michigan 2023 – present
- Rodolfo Alexander Quintero Ospina, Department of ISE, Lehigh University 2022 – present
- Oumaima Sohab, Department of ISE, Lehigh University 2022 – present
- Man-Yiu Tsang, Department of ISE, Lehigh University 2022 – present
- Yutong Dai, Department of ISE, Lehigh University 2021 – present
- Secil Sozuer, Department of ISE, Lehigh University 2019 – present
- Mertcan Yetkin, Department of ISE, Lehigh University 2018 – present
- Suresh Bolusani, Department of ISE, Lehigh University 2016 – present
- Melody Xuan, Department of IEMS, Northwestern University 2022 – 2023
 Research: *Methods for Derivative-Free Optimization with Applications in Machine Learning*
 Advisor : Jorge Nocedal
- Zheng Shi, Department of ISE, Lehigh University 2021 – 2022
 Research: *Advanced Algorithms and Applications in Machine Learning*
 Advisor : Martin Takáč
- Shusen Jing, Department of ECE, Lehigh University 2021 – 2022
 Research: *Communication-efficient Federated Learning: Fast Convergence and Aggregation
 through Over-the-air Computation*
 Advisor : Chengshan Xiao
- Suyun Liu, Department of ISE, Lehigh University 2020 – 2022
 Research: *Stochastic Multi-Objective Optimization and Its Application to Fairness in ML*
 Advisor : Luis Nunes Vicente

- Jonathan Grant-Peters, Wolfson College, University of Oxford 2021
 Research: *Non-Smooth Optimization Applied to Improving Steam Engine Turbines*
 Advisor : Raphael Hauser
- Majid Jahani, Department of Industrial and Systems Engineering, Lehigh University 2019 – 2021
 Research: *Efficient and Scalable Optimization Methods for Training Large-scale Machine Learning Models*
 Advisor : Martin Takáč
- Liyuan Cao, Department of Industrial and Systems Engineering, Lehigh University 2019 – 2021
 Research: *Model-Based Derivative Free Optimization Methods and Analysis of Stochastic Nonlinear Optimization*
 Advisor : Katya Scheinberg
- Wenbo Gao, Industrial Engineering and Operations Research, Columbia University 2020
 Research: *Convex Optimization and Extensions, with a View Toward Large-Scale Problems*
 Advisor : Donald Goldfarb
- Xin Shi, Department of Industrial and Systems Engineering, Lehigh University 2019 – 2020
 Research: *Advanced Optimization Methods for Problems in Power Systems and Polynomial Optimization*
 Advisor : Luis Zuluaga
- Azam Asl, Department of Computer Science, New York University 2017 – 2020
 Research: *Behavior of the Limited-Memory BFGS Method on Nonsmooth Optimization Problems in Theory and Practice*
 Advisor : Michael Overton
- Tianyi Chen, Department of Applied Mathematics and Statistics, Johns Hopkins 2018
 Research: *A Fast Reduced-Space Algorithmic Framework for Sparse Optimization*
 Advisor : Daniel P. Robinson
- Lam Nguyen, Department of ISE, Lehigh University 2017 – 2018
 Research: *A Service System with On-demand Agents, Stochastic Gradient Algorithms and SARAH Algorithm*
 Advisor : Katya Scheinberg
- Xi He, Department of ISE, Lehigh University 2017 – 2018
 Research: *Distributed Algorithms in Large-scaled Empirical Risk Minimization: Non-convexity, Adaptive Sampling, and Matrix-free Second-order Methods*
 Advisor : Martin Takáč
- Wei Xia, Department of ISE, Lehigh University 2017 – 2018
 Research: *Solution Techniques For Non-convex Optimization Problems*
 Advisor : Luis Zuluaga
- Afshin OroojlooyJadid, Department of ISE, Lehigh University 2017 – 2018
 Research: *Application of Machine Learning in Supply Chains*
 Advisor : Lawrence V. Snyder
- Chenxin Ma, Department of ISE, Lehigh University 2017 – 2018
 Research: *Distributed Methods for Composite Optimization: Communication Efficiency, Load-Balancing and Local Solvers*
 Advisor : Martin Takáč
- MirSaleh Bahavarnia, Department of MEM, Lehigh University 2016 – 2018
 Research: *Sparsity-Promoting Optimal Controller Design*
 Advisor : Nader Motee

- Hiva Ghanbari, Department of ISE, Lehigh University 2016 – 2018
 Research: *Optimization Algorithms for Machine Learning Problems*
 Advisor : Katya Scheinberg
- Jie Liu, Department of ISE, Lehigh University 2015 – 2018
 Research: *Recent Advances in Randomized Methods for Big Data Optimization*
 Advisor : Martin Takáč
- Nitish Keskar, Department of IEMS, Northwestern University 2016 – 2017
 Research: *Second-Order Methods for Stochastic and Nonsmooth Optimization*
 Advisor : Andreas Wächter
- Miao Bai, Department of ISE, Lehigh University 2015 – 2017
 Research: *Optimization of Surgical Appointment Scheduling in Multiple Operating Rooms
 with Post Anesthesia Care Unit Constraints*
 Advisor : Robert Storer
- Matt Menickelly, Department of ISE, Lehigh University 2015 – 2017
 Research: *Random Models in Nonlinear Optimization*
 Advisor : Katya Scheinberg
- Hao Jiang, Department of Applied Mathematics and Statistics, Johns Hopkins 2011 – 2016
 Research: *Adaptive Augmented Lagrangian Methods for Large-Scale Nonlinear Optimization*
 Advisor : Daniel P. Robinson
- Xiaocheng Tang, Department of ISE, Lehigh University 2013 – 2015
 Research: *Big Data Optimization in Machine Learning*
 Advisor : Katya Scheinberg
- Yunfei Song, Department of ISE, Lehigh University 2013 – 2015
 Research: *Optimization Theory and Dynamical Systems:
 Invariant Sets and Invariance Preserving Discretization Methods*
 Advisor : Tamás Terlaky
- Mohsen Moarefdoost, Department of ISE, Lehigh University 2013 – 2015
 Research: *Optimization Models for Electricity Networks and Renewable Energy under Uncertainty*
 Advisor : Lawrence V. Snyder
- Xi Bai, Department of ISE, Lehigh University 2013 – 2015
 Research: *Enhanced First-Order Methods in Convex and Nonconvex Optimization*
 Advisor : Katya Scheinberg
- Tim Mitchell, Department of Computer Science, New York University 2014
 Research: *Robust and Efficient Methods for Approximation and Optimization of Stability Measures*
 Advisor : Michael L. Overton
- Murat Mut, Department of ISE, Lehigh University 2011 – 2014
 Research: *Curvature as a Complexity Bound in Interior-Point Methods*
 Advisor : Tamás Terlaky
- Robert Howley, Department of ISE, Lehigh University 2012 – 2013
 Research: *Optimization Methods in Statistics*
 Advisors: Robert H. Storer and Luis Zuluaga
- Serdar Yildiz, Department of ISE, Lehigh University 2012 – 2013
 Research: *Improvements to Methods for Branching and Cutting in Integer Programming*
 Advisor : Theodore K. Ralphs

- Julio César Góez, Department of ISE, Lehigh University 2010 – 2013
 Advisor : *Mixed Integer Second Order Cone Optimization Disjunctive Conic Cuts*
 Research: Tamás Terlaky
- Daniel Scansaroli, Department of ISE, Lehigh University 2009 – 2012
 Research: *Stochastic Modeling with Temporally Dependent Gaussian Processes*
 Advisor : Vladimir Dobrić and Robert H. Storer
- Camilo Mancilla, Department of ISE, Lehigh University 2009 – 2011
 Research: *Stochastic Scheduling of Operating Rooms*
 Advisor : Robert H. Storer

Master Student Advisees (for Masters Theses)

- Baoyu Zhou, Department of ISE, Lehigh University 2017 – 2018
 Research: *Quadratic Optimization for Nonsmooth Optimization Algorithms: Theory and Numerical Experiments*
- Jingxuan Liu, Department of ISE, Lehigh University 2015
 Research: *Multivariate Time Series Study of Foreign Currency Exchange Rates*
- Wenda Zhang, Department of ISE, Lehigh University 2013 – 2014
 Research: *A Subproblem Algorithm for an Adaptive Augmented Lagrangian Method*

Undergraduate Student Advisees (for Senior Theses)

- Yan (Mandy) Liu, Department of ISE, Lehigh University 2010 – 2012
 Research: *Numerical Optimizatoin Methods in Machine Learning*
