

LEHIGH

UNIVERSITY

Course Syllabus, Fall 2024

ISE ISE 401 :
Convex Analysis

Course Information:

Lectures: Tuesdays & Thursdays, 1:35pm-2:50pm, Mohler 453

Office Hours: Tuesdays, 4:15pm-5:15pm

Instructor Information:

Name: Frank E. Curtis

Office: Mohler 471

Phone: +1 (610) 758-4879 (Office)

+1 (646) 789-5490 (Mobile)

E-mail: frank.e.curtis@gmail.com

frank.e.curtis@lehigh.edu

Chat: [frank.e.curtis](#) (Google)

Web: <http://coral.ise.lehigh.edu/frankecurtis>

Description: Convexity, as it is defined for sets and functions, is of fundamental importance in the study of various problems in applied mathematics and engineering. The purpose of this course is to provide a rigorous introduction to the rich field of convex analysis, particularly as it relates to mathematical optimization and duality theory. In addition to formal analytical tools and concepts, emphasis is placed on developing a geometric and intuitive understanding of convex objects, optimization problems, and duality concepts.

Course Objectives: The objectives of this course are for students to do the following:

- Understand the central role of convexity in applied mathematics and optimization in particular.
- Learn basic concepts related to convex sets and functions.
- Explore important special types of convexity, such as polyhedral convexity.
- Gain a fundamental understanding of duality via insights provided by geometric arguments.
- Investigate concepts related to conjugacy and the calculus of subdifferentiable functions.
- Develop a mathematically rigorous understanding of an important area of research.
- Be able to apply course concepts in other areas of scientific research.

Prerequisite Topics: Mathematical logic, multivariable calculus, linear algebra, and real analysis.

Important dates:

Day	Date	Note
Tuesday	August 27	First lecture
Thursday	September 26	No lecture (Prof. Curtis travel)
Tuesday	October 15	No lecture (Prof. Curtis travel)
Tuesday	October 22	No lecture (Prof. Curtis travel)
Thursday	November 28	No lecture (Thanksgiving Day)
Thursday	December 5	Last lecture

Textbook: The primary textbook for the course is [1]. Reading the textbook is not required, but it is recommended. You are not responsible for textbook material that is not covered in lecture. Course material also will be derived from [2, 3, 4, 5, 6, 7].

Expected Schedule:

Week	Lecture Topic(s)
1	Motivation and Background
2	Convex Sets
3	Projections, Hulls, and Relative Interiors
4	Recession Cones and Lineality Spaces
5	Hyperplanes, Separation, and Polyhedral Sets
6	Convex Functions
7	Conjugate Functions
8	Fundamentals of Convex Optimization
9	Geometric Duality Framework
10	Convex Optimization Duality
11	Subdifferential Theory
12	First-Order Algorithms
13	Second-Order Algorithms
14	Constrained Optimization Algorithms
15	Review

Course Model: Lectures will be held in person unless otherwise announced. If circumstances make it such that a lecture cannot be held in person, then it will be held virtually by Zoom in a synchronous manner; any such lecture can be accessed at <https://lehigh.zoom.us/my/frank.e.curtis>.

Office Hours: Please come to office hours if you have any questions. I am also happy to set up a meeting at other times, if I am available, by appointment. I am also available through e-mail (always) and on Google Chat (often). If I do not respond to an e-mail within 24 hours, then please assume that I have not received it and send a follow-up e-mail. If I do not respond on Google Chat, then I am either busy or you are contacting me too late in the day, in which case you can try again the next day or send an e-mail instead.

Zoom: Zoom sessions, either for lectures (as needed) or other meetings, work best when all students who join are ready to participate and follow the same guidelines regarding the use of video. I will be asking all students to turn on their cameras during Zoom sessions. If you have a strong preference not to do so, then please let me know in advance of the Zoom session. Students should respect everyone's privacy by not taking screenshots nor recording the live sessions. I do *not* plan to record any lectures, although if requested a Zoom session can be recorded if all participants agree. If recordings are ever made, then they would only be shared with students in the class and will be deleted at the end of the semester.

Course Site: Lecture notes will be posted on Course Site. Homework assignments, solutions, announcements, and other important material will also be posted on Course Site. Important information, corrections, and updates about the course may also be sent by Course Site.

Grading: Your grade will be calculated based on the following percentages.

Participation:	5%
Homework:	30%
Midterm Exam:	30%
Final Exam:	35%

See the subsequent sections for information about each of these components. Once numerical grades are calculated, a letter grade will be assigned based on the following table of outcomes.

[100, 93]	(93, 90]	(90, 87]	(87, 83]	(83, 80]	(80, 70]	(70, 60]	(60, 0]
<i>A</i>	<i>A-</i>	<i>B+</i>	<i>B</i>	<i>B-</i>	<i>C</i>	<i>D</i>	<i>F</i>

Participation: Attendance will not be taken. However, participation will factor into your grade. Participation means being an active member of the course during lecture times by answering questions, asking questions, offering insights, etc. If you need to miss one or a few lectures, then this will not necessarily adversely affect your participation grade. However, if you are not an active member of the lectures that you attend, then it will adversely affect your participation grade.

Homeworks: There will be a few homework assignments throughout the semester, generally assigned and due every few weeks. Each homework must be submitted electronically via Course Site. No credit will be given for any late assignment. You are free to consult with other students when working on homeworks, but the work you submit must be your own. *Please cite any references you use, including fellow students.* Your homework grade will be determined by the number of points you accumulate over the entire semester as compared to the maximum number of points that are possible to accumulate. In this manner, homeworks with more questions will effectively have a higher weight in determining your homework grade. No homework grades will be dropped. See below for further instructions about submitting work as L^AT_EX-generated PDFs.

Exams: Both exams will be cumulative, in-person, and closed-notes.

L^AT_EX: All homework must be submitted as documents produced with L^AT_EX. There are no exceptions to this requirement. I will provide a template for homework solutions. It is not required that you use the provided template, but it is recommended, especially if you are unfamiliar initially with L^AT_EX.

Submitting Work: Your solutions for each homework assignment must be submitted as a single PDF file. There are no exceptions to this requirement. Please do not attempt to submit multiple files for any assignment, and please do not attempt to submit any other type of file besides a PDF file.

Collaboration Policy: The sharing of ideas is educationally useful and you are encouraged to discuss assignments with other students. However, *plagiarism* of any kind is destructive, fraudulent, and unacceptable. You are *strictly* forbidden to copy another student's written work, whole or in part, and submit that work under your name. You are also *strictly* forbidden to make trivial or mechanical changes to another student's written work and submit that work under your name. Note that while electronic plagiarism is easier to perform (via copy-and-paste), it is also easier to detect. Plagiarized work will receive no credit and repeat offenses will result in more severe action. A sure way to avoid this issue is to discuss the assignments with fellow students, but then write your solutions individually and independently.

Emergencies: Everyone is responsible for all material covered and announcements made in lecture. If you believe you will miss a long period of time in the course due to illness, a family emergency, etc., then please contact me as early as possible. Under no circumstances will credit be given for missed work unless you have discussed your absence with me in advance.

Regrade Requests: If you disagree with a grade you receive, then you may submit a regrade request. This request must be written and submitted no more than 48 hours after you receive the grade.

Recording Devices: Voice and/or video recording devices may be used only with the approval of everyone. Please let me know in advance if you wish to record voice and/or video.

Accommodations for Students with Disabilities: Lehigh University is committed to maintaining an equitable and inclusive community and welcomes students with disabilities into all of the University's educational programs. In order to receive consideration for reasonable accommodations, a student with a disability must contact Disability Support Services (DSS), provide documentation, and participate in an interactive review process. If the documentation supports a request for reasonable accommodations, DSS will provide students with a Letter of Accommodations. Students who are approved for accommodations at Lehigh should share this letter and discuss their accommodations and learning needs with instructors as early in the semester as possible. For more information or to request services, please contact Disability Support Services in person in Williams Hall, Suite 301, via phone at 610-758-4152, via email at indss@lehigh.edu, or online at <https://studentaffairs.lehigh.edu/disabilities>.

Lehigh University Policy on Harassment and Non-Discrimination: Lehigh University upholds [The Principles of Our Equitable Community](#) and is committed to providing an educational, working, co-curricular, social, and living environment for all students, staff, faculty, trustees, contract workers, and visitors that is free from harassment and discrimination on the basis of age, color, disability, gender identity or expression, genetic information, marital or familial status, national or ethnic origin, race, religion, sex, sexual orientation, or veteran status. Such harassment or discrimination is unacceptable behavior and will not be tolerated. The University strongly encourages (and, depending upon the circumstances, may require) students, faculty, staff or visitors who experience or witness harassment or discrimination, or have information about harassment or discrimination in University programs or activities, to immediately report such conduct. If you have questions about Lehigh's Policy on Harassment and Non-Discrimination or need to report harassment or discrimination, contact the Equal Opportunity Compliance Coordinator (Alumni Memorial Building / 610.758.3535 / eocc@lehigh.edu).
